

MODEL GP-HV12-TR

AUTOMATIC PACKAGING MACHINE FOR PRE-MADE POUCHES (Bag Fill and Seal Machines)

■ FEATURES

This is a full-scale automatic packaging machine which is equipped with a device to automatically supply trays and drier(de-oxidizer).

It contributes to the labor-saving by means of automating the operations which were formerly done by hands.

It can be widely applied to the bags with tray, deoxidant & drier, and easily operated just as the conventional automatic pouch fill-sealing machines.
